

IMANUEL ZAGOTO

Software Engineer | Backend & Full-Stack Developer | Python • Go

Bekasi, Indonesia | +6282111530582 | imanzgt735@gmail.com | linkedin.com/in/manuel-zagoto | github.com/izagoto

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in backend and full-stack development, specializing in Python, Go, PHP, JavaScript, REST APIs, and database-driven applications. Experienced in developing backend systems, internal web applications, automation solutions, monitoring systems, and data processing pipelines. Currently involved in cybersecurity research and digital forensics, with hands-on experience in data parsing, artifact extraction, metadata analysis, evidence extraction, log analysis, data correlation, and automation; experienced with FastAPI, Laravel, Express.js, React.js, Next.js, PostgreSQL, MySQL, Redis, Docker, Linux, and Git.

PROFESSIONAL EXPERIENCE

Cybersecurity Researcher

PT Solusi Intek Indonesia — Bekasi, Indonesia

Nov 2025 - Present

Contribute to cybersecurity tooling and digital forensics R&D to support investigations and internal operations, focusing on research methodology, data integrity, and technical implementation.

- Developed a digital forensics research platform for asynchronous Android and iOS acquisition, including contacts, SMS, WhatsApp, call logs, and media.
- Developed a digital forensics case management platform supporting Chain of Custody, contact and social media correlation, communication analysis, and APK analysis.
- Developed an operational forensics and intelligence platform for multi-source communication analysis, case and task management, integrity-verified evidence tracking, and entity correlation.
- Built a multi-GPU distributed password-cracking system using Go and hashcat, with a real-time dashboard and agent orchestration.
- Conducted controlled OSINT and Bluetooth/BLE security research involving account verification, metadata collection, passive monitoring, device scanning, signal analysis, and RSSI-based location estimation.
- Developed a mobile application static analysis platform for APK/IPA files, including permission checks, malware analysis, and automated PDF reporting.
- Developed a cybersecurity asset inventory system supporting asset tracking, photo-based evidence, approval workflows, and asset ownership management.

Software Engineer Staff

PT Solusi Intek Indonesia — Bekasi, Indonesia

Oct 2022 – Oct 2025

Developed and maintained backend systems, full-stack web applications, and automation solutions supporting monitoring systems, media intelligence, and business operations.

- Developed a Go-based backend for a wireless monitoring command center supporting target tracking, device telemetry, and remote machine control.
- Built a media intelligence pipeline for online media crawling, NLP-based analysis, and structured data storage for trend monitoring.
- Developed multi-device WhatsApp and Telegram automation using ADB, UIAutomator2, Telethon, Accessibility Service, and OTP reader integrations.

- Developed internal operations applications using Laravel for work document management, including funding requests and work orders.
- Developed an e-procurement system supporting purchase requisitions, multi-level approval workflows, vendor management, purchase orders, delivery tracking, budget control, audit trails, and PDF/Excel reporting.

TECHNICAL SKILLS

Programming Languages	: Python, Go, PHP, JavaScript, SQL.
Backend Development	: FastAPI, Laravel, Express.js, REST APIs, WebSockets, API Integration.
Frontend Development	: React.js, Next.js, Tailwind CSS, Bootstrap, HTML, CSS.
Desktop Development	: Electron.
Database	: PostgreSQL, MySQL, SQLite, Redis.
Cybersecurity & Digital Forensics	: Digital Forensics, Security Research, Data Parsing, Artifact Extraction, Metadata Analysis, Evidence Extraction, Log Analysis, Data Correlation, Mobile Security, Wireless Security, Open Source Intelligence (OSINT), Malware Analysis, Hashing, MD5, SHA.
Data & Automation	: ETL, Data Processing, Data Modeling, Data Transformation, Workflow Automation, Web Scraping, Web Crawling.
Tools & Infrastructure	: Ubuntu/Linux, Nginx, Docker, Git, Postman, ADB.

EDUCATION

STMIK WIDURI

Bachelor's Degree in Computer Engineering

Jakarta, Indonesia | Aug 2018 – Sep 2022
